Anthony Fink

Full Stack Web Developer · Front End / Integration

Tel Aviv, Israel · +972-545-249-433 · psytonik@icloud.com
anthonyfink.dev · github.com/psytonik · linkedin.com/in/anthony-fink

SUMMARY

Full stack developer who takes products from idea to production: React, Next.js and React Native on the front, Node.js, NestJS and PostgreSQL on the back. Founder of two products, one of them an AI-powered mobile app live in the App Store and Google Play. Focused on data integrity, reliable delivery and fast, accessible interfaces. Works daily with AI coding agents.

EXPERIENCE

Traveller – AI walking-route planner · Founder & Full-Stack Engineer 2026 – Present

Built and launched solo: iOS and Android apps plus a web app, live in the App Store and Google Play, with paid subscriptions · travellerapp.org

- Designed a TypeScript monorepo: Express API with clean architecture, Prisma and PostgreSQL, Redis, and a shared types package used by API, web and mobile.
- Built the AI route-generation pipeline: LLM prompts, output validation, route optimization, and caching and cost controls that keep AI spend in check.
- Shipped a cross-platform Expo / React Native app to both stores, and release fixes over the air with EAS Update.
- Integrated paid subscriptions on web and mobile through third-party payment providers, with server-side entitlement sync.
- Built the React, Vite and Tailwind web app with Leaflet maps, localized in 9 languages, and a marketing site with SEO.
- Run CI/CD and hosting on Vercel and Railway with staging, Sentry monitoring and an admin panel. Own SEO, content and growth.

GigCalm – booking platform for performing artists · Founder & Full-Stack Engineer Present

NestJS API and two Next.js apps (public marketplace, artist studio) in one monorepo · gigcalm.com

- Architected a feature-based NestJS modular monolith on PostgreSQL and Redis: JWT access/refresh auth with Redis-backed sessions, global role guards, rate limiting, DTO validation, and TypeORM migrations with synchronize off.
- Eliminated double-booking at the database level with a PostgreSQL exclusion constraint (gist over staff and time range), so concurrent requests cannot take the same slot.
- Wrote the availability engine as a pure, unit-tested function: working hours, buffers, 15-minute grid, overnight shifts and per-business time zones.
- Built reliable email delivery with a transactional outbox and a BullMQ worker with retry and backoff, so notifications survive Redis or SMTP outages.
- Protected personal data with AES-256-GCM field encryption; secured single sign-in across sites with a shared-domain cookie and open-redirect checks.
- Built two Next.js 16 / React 19 / Tailwind 4 apps in Hebrew (RTL), English, French and Russian; tested with Jest and Playwright; CI on GitHub Actions; deployed on Railway and Vercel.

Testo Pay Affiliate Program · Full Stack Web Developer Aug 2020 – 2026

- Integrated the Google Analytics SDK and built landing pages and internal dashboards with Next.js / React, TypeScript and Redux on the front, Node.js and TypeScript on the back.
- Built a responsive interface with Material UI.

Dimension Booking · Full Stack Developer 2020 – 2021

- Developed an application for booking music artists worldwide with Node.js, React/Redux, JavaScript, HTML5, CSS3 and Bootstrap; integrated the Stripe API for billing.

SKILLS

Front end React, Next.js, React Native, Expo, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Chakra UI, Material UI, Redux

Back end Node.js, Express, NestJS, REST APIs, BullMQ, RabbitMQ, JWT auth

Databases PostgreSQL, Redis, MongoDB, Microsoft SQL, Prisma, TypeORM

Testing / DevOps Jest, Vitest, Playwright, GitHub Actions, Docker, Vercel, Railway, Sentry

Tools Git, GitHub, WebStorm, VS Code, Postman, Jira, YouTrack; AI coding agents (Claude Code)

EDUCATION

- 2018 – 2019 · Certificate, Full Stack Web Development, John Bryce (average 96)
- 2023 · Udemy course, SQL from beginner to pro (PostgreSQL)
- 2016 – 2018 · Self-study, HTML / CSS / JavaScript

LANGUAGES

Russian – native · Hebrew – native level · English – good

INTERESTS

Video editing (Adobe Premiere Pro), audio production (Ableton Live)
